

UNIT - III

Organising

Q1. Types Of Organization

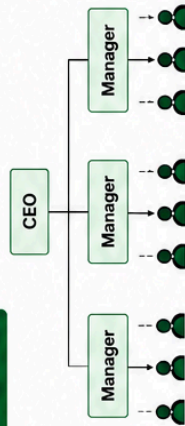

VARIOUS TYPES OF ORGANISATION

Organisation is a process of identifying and grouping the activities required to attain objectives, assigning authority, creating responsibilities and establishing relationships for people to work effectively.

A. BASED ON NATURE

1. FORMAL ORGANISATION

- Officially planned by management.
- Clear hierarchy of authority.
- Defined jobs, responsibility and relationships.
- Communication follows official channels.

Example: Government departments, large manufacturing companies, banks.

2. INFORMAL ORGANISATION

- Develops naturally among employees.
- Based on friendship, personal relationships and common interests.
- No fixed structure.
- Communication is informal.

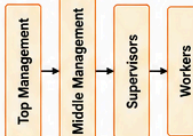

Example: Friends in the workplace, social groups, informal discussion groups.

B. BASED ON STRUCTURE

3. BUREAUCRATIC ORGANISATION

- Follows strict hierarchy.
- Clear authority and rules.
- Communication is formal.
- Jobs are clearly defined.

Example: Government offices, defence services, public sector undertakings.

4. ORGANIC ORGANISATION

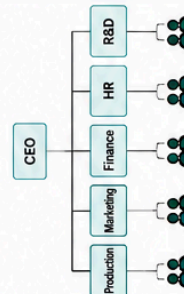

- Flexible and adaptable.
- Less formal rules.
- Open communication.
- Employees can take initiative.
- Suitable for changing environment.

Example: Start-ups, IT companies, research and development firms.

5. FUNCTIONAL ORGANISATION

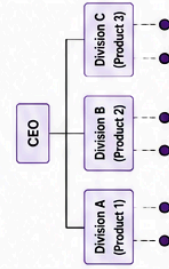

- Employees are grouped according to their specialisation or function.
- Each function has a separate manager.

Example: Manufacturing companies, hospitals, universities.

6. DIVISIONAL ORGANISATION

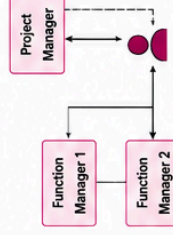

- Organisation is divided into divisions based on products, markets or geographical areas.
- Each division is almost an independent unit.

Example: Large companies like Tata Group, Reliance Industries.

7. MATRIX ORGANISATION

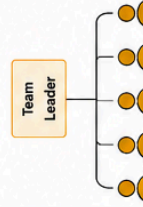

- Combination of functional and project structure.
- Employee reports to two managers.
- Used for complex projects.

Example: Construction companies, IT project organisations.

8. TEAM ORGANISATION

- Employees work in teams.
- Team members share responsibility.
- Focus on achieving common goals.

Example: Project teams, product development teams, sport teams.

Q2. Job Designing

Job designing is the process of arranging the duties and responsibilities of a job in a proper way.

It aims to make the job suitable for both:

- Organisation
 - Employee
-

Objectives of Job Designing

The two main objectives are:

1. Meet organisational requirements

The job should help the organisation achieve its goals.

2. Satisfy employee needs

The job should make employees feel interested, comfortable and satisfied with their work.

3. Types / Techniques of Job Designing

The three important techniques are:

- A. Job Enlargement
 - B. Job Rotation
 - C. Job Enrichment
-

JOB DESIGNING

Job designing is the process of arranging the duties, responsibilities and activities of a job in a proper way.

ORGANISATIONAL NEEDS

- The job should help the organisation achieve its goals.

EMPLOYEE NEEDS

- The job should satisfy the needs of employees and give them job satisfaction.

PROPER JOB DESIGN

1. JOB ENLARGEMENT

Increasing the number of tasks performed by an employee at the same level.
